Company Information:

In Taiwan our company was established in 1970, and we first presented chain feeding machine, and then presented bell shaped automatic drinking fountain, and progressively presented galvanized silo, and spiral type feeding system selling over sea and in Taiwan, several years of sales experience was known all over the world.

Still seeking for the best quality, and the business kept on growing, in order to increase the service of the company, we imported several types of pasteurizing tool, and importing the crop silo appliances, we served all areas with the very same spirit, and with the multiple way of running that has won many rewards of the American sales prize for many years.

Our company plans to have advance obtain the agency of house structure business of the. After 1980 because of the needs of the local market we made automatic feeding for chickens and pigs, and NIPPLE SYSTEM, for the diversity of the products also made FEEDING BIN SYSTEM, and FRP SILO.

As for the chickens we obtained the agency of the HAND GATHERED NESTS.
