

AJ-104 Wings Sprinkler Hose

Sprinkler hose also named as rain pipe, rain tape, spray tube etc. It is a flat hose with many pores on the hose to spray water mistily. Its hose wall is thin and operates in low water pressure, low energy consuming. In addition the sprinkler hose irrigation system is easy to install, easy to maintain, easy plug clearing. That makes the sprinkler hose irrigation system is the lowest cost irrigation compared with other irrigation systems.

This system can operate without filters at head if the water is not very dirty. It only needs to open the end clip of sprinkler hose sometimes and flush out dirt inside the hose. Even if the pores are blocked very much it can be washed the inside of hose with brushing cloth. The way is let brushing cloth plug into hose and let water push it throughout the hose. This way can clean inside adhesion dirt at pores.

But the thin wall flat hose may be scratched while it lay on ground. Also the animals at field such as rat may bite it and make it broken.

AJ-104 wings sprinkler hose: you can name it wings rain pipe, wings rain tape, wings spray tube also. It is for the purpose of preventing the main pores hose. There are 2 wings at both edges of main sprinkler hose. Its wings protect main hose not to be scratched or bitten by animals. Also this wings sprinkler hose can keep steady for the wings at 2 edges can support the hose not twist and keep body of hose balance. That can keep pores on the hose to spray in the right direction from beginning to end and watering at a certain range beside the hose.
